

WHAT IS CLAIMED IS:

1. An information display system, comprising:
a display for displaying a facility information screen;
an information extractor for extracting position identification information from said facility information screen;
a search unit for searching for a facility corresponding to said position identification information;
a facility information registration unit for registering facility information including the position of the searched facility; and
a facility information storage unit for storing the registered facility information.
2. An information display system according to claim 1, further comprising:
an information terminal including said display and a transmitter/receiver unit;
and
a server including said information extractor, said search unit, said facility information registration unit, said facility information storage unit, and a transmitter/receiver unit.
3. An information display system according to claim 1, comprising an information terminal including said display, said information extractor, said search unit, said facility information registration unit, and said facility information storage unit.
4. An information display system according to claim 1, wherein said position identification information includes at least one of a telephone number and an address, and said facility information registration unit verifies the consistency between the at least one of the telephone number and the address and sets the position of the facility depending on the result of the verification of the consistency.
5. An information display system according to claim 1, wherein the facility information includes a schedule in terms of a scheduled date/time.
6. An information display system according to claim 5, wherein a notification of the facility information is given in advance.
7. An information display system according to claim 5, wherein the schedule is deleted when the scheduled date/time expires.
8. An information display system according to claim 5, wherein the schedule is updated when the scheduled date/time expires.

9. An information display system according to claim 2, wherein said position identification information includes at least one of a telephone number and an address, and said facility information registration unit verifies the consistency between the at least one of the telephone number and the address and sets the position of the facility depending on the result of the verification of the consistency.

10. An information display system according to claim 3, wherein said position identification information includes at least one of a telephone number and an address, and said facility information registration unit verifies the consistency between the at least one of the telephone number and the address and sets the position of the facility depending on the result of the verification of the consistency.

11. An information display system according to claim 2, wherein the facility information includes a schedule in terms of a scheduled date/time.

12. An information display system according to claim 3, wherein the facility information includes a schedule in terms of a scheduled date/time.

13. An information display system according to claim 4, wherein the facility information includes a schedule in terms of a scheduled date/time.

14. An information display system according to claim 6, wherein the schedule is deleted when the scheduled date/time expires.

15. An information display system according to claim 6, wherein the schedule is updated when the scheduled date/time expires.
